MEMORANDUM FOR THE RECORD

SUBJECT: Trip Report - Beale Air Force Base, California
14 - 16 July 1963 (OXCART)

1. Colonel Houser C. Wilson, AFIGO-S, and [redacted] visited Beale Air Force Base 14 - 16 July 1963 to establish PF-1 fuel storage facilities. 25X1

2. Colonel Sam J. Byerly, Commander, 14th Strategic Aerospace Division (cleared O-3), accompanied the visiting party on a tour of the air base to select a suitable fuel storage site. A location within the Beale POL storage facility was eventually selected. This location at the present base storage site is ideally situated to provide ease of handling and transportation of fuel to the flight line area.

3. The [redacted] has been authorized to proceed with construction of two (2) 10,000-barrel fuel storage tanks, complete with on-load, off-load, and filter facilities. The area selected for construction is presently properly fenced and lighted. Additional security is provided by duty personnel during the day and roving air police patrols at night. Estimated completion date is mid September. 25X1

4. A support agreement was negotiated with the Base Commander to provide administrative and logistical support to the two Project Headquarters assigned personnel who will be based at Beale Air Force Base as an OXCART fuel quality control team. Copies of this agreement are on file in SD/OSA as well as MMPD.
